

PR-203

Portable Battery Operated Indicator

Introduction

Portable Indicator with 9V DC Battery operated Instrument which can accept mV, mA, resistance as Input (Need to specify while ordering) . Hence suitable for any parameter like Temp., Pressure, pH, Flow, etc.

Features

- Wide Acceptance for various Inputs, Range, Engg, units.
- Automatic Cold Junction Compensation of T/C
- Typical Accuracy $0.2\% \pm 1$ digit
- Indication $3\frac{1}{2}$ digit LCD
- Size 160*85*35 mm
- Built in battery compartment
- Male / female Socket provision to connect “ Sensor”

Technical Specifications

Range	Specify as per Requirement
Resolution	0.1 OR 1° C
Input	Cr Al T/C
Indication	$3\frac{1}{2}$ digit LCD
Accuracy	$0.2\% \pm 1$ digit(Linear to Input)
Size	16 * 85 * 35 H *W*D
P.S.	9V Battery Size PP3

- Note :- Your requirement can be fulfilled by selecting operating range & Calibrate within that range to get better accuracy.

Application

- 1) Quick calibration of instruments with Specific thermocouple input.

-
- Due to continuous development specifications are subject to change without notice.
